

## Introducing **Healow** for your iPhone or Android Phone

# THE BEST ACCESS IN ROCKLAND COUNTY JUST GOT BETTER!

by Gregg Rockower, MD

iPhone App

Android App

Over the past forty-five years, your doctors at *Clarkstown Pediatrics* have been providing the best and most up-to-date care for your children. We have made ourselves the most accessible practice in Rockland County. We have office hours 365 days a year (every day), evening hours on all weekdays, and for the few hours that we are closed we are available by phone to answer your urgent questions.

We are now able to take access to Clarkstown Pediatrics even farther. Two years ago we introduced our *Patient Portal* which is available on our website, [www.clarkstownpeds.com](http://www.clarkstownpeds.com). Our office will give you a unique username and password for each patient, then parents can securely log in to the *Portal* and see their child's health record. It invites parents to become active partners in their children's healthcare. Through the *Portal* parents can check their child's records for accuracy, as well as print vaccine records or recent lab results. Finally, parents can communicate **non-urgent** questions, appointment requests, or issues with their child's provider or a member of our staff via secure e-mail.

We are now adding access when you want it from the convenience of your Smartphone. The App is called **Healow** and it was created to interact with your child's electronic health record. It is available for both *iPhone* and *Android* phones, and links can be found on our website. With **Healow**, parents can access multiple accounts from one convenient location. They can manage their medicine cabinet by organizing their prescriptions with customized names, photos of the med, and alerts that remind them when to take each medication. They can organize their appointments and receive important reminders. They can communicate securely with their provider and avoid having to take a call while they are at work or trying to juggle their other family needs.

So download **Healow** and put your child's health record at your fingertips today!

We hope you find our Parentletter helpful and informative. Please keep in mind that receipt of this newsletter does not create a doctor/patient relationship and that it is not meant to serve as a substitute for professional medical advice. For particular pediatric medical concerns, including decisions about diagnoses, medications and other treatments, or if you have any questions after reading this newsletter, we encourage you to speak with your child's pediatrician.
