

Dr. Hamburg is Moving In December!

We wish her well, and we will miss her...

by Monica Hamburg, MD

It is with great sadness that I announce I will be leaving our wonderful *Clarkstown Pediatrics*. I have loved caring for your children here for the past 5 years, and had hoped to care for them until they became adults!

Many of you have met my husband, Dr. Donovan Rosas, a local plastic surgeon. (He has stitched up a number of our little patients!) An important job opportunity arose for my him out-of-state, so our family will be leaving Rockland County.

Clarkstown Pediatrics has been a wonderful place to work, and I have felt fortunate to be a part of it. My own daughters will miss their pediatrician, Dr. Rockower!

If I haven't had the opportunity to speak with you in person yet, please know that I will miss my patients and my colleagues here very much!

I will remain working here through the end of November and after that I know that my patients will be in good hands with any of the other capable and kind doctors and nurse practitioner here. Thank you all for a wonderful 5 years!

Editor's note: Dr. Hamburg has been a trusted colleague for the past five years and made connections with so many families. She is a terrific pediatrician. Please join us in wishing her and her family well as she relocates to another state.

Dr. Hamburg received her medical degree from the University of Rochester in 2004 and completed her pediatric residency training at Brown University in 2007. She worked as a full-time pediatrician for 4 years in Rhode Island prior to moving to Rockland County in July, 2011. She was a member of the National Health Service Corps, working in an underserved community in Rhode Island, and helped develop a pediatric asthma program for the health center in which she worked.

Dr Hamburg is a board-certified pediatrician and member of the American Academy of Pediatrics. She was born in Texas, raised in Montana. She is the mother of two young girls, and enjoys spending time with her daughters, husband, and dog. She worked with *Clarkstown Pediatrics* from February 2012 through November 2016.
